

“Eileen and CMETB have been excellent in working with Combilift and other local Companies to tailor this course to suit our needs. The quality and standard of this course has been fantastic. I found this course very beneficial in my role as Machine Shop Manager. This course greatly enhanced my knowledge of solidworks. Combilift employees from various departments gained valuable insight into Solidworks which has improved our processes and efficiencies as a result of the learnings from this course. I would strongly recommend this course to anyone that wants to improve their knowledge on Solidworks. “

Jason McKenna, Combilift
